Dear Valued Goliath Ventures Participants,

At Goliath Ventures, transparency and trust are the cornerstones of our operations in the dynamic world of decentralized finance. We are thrilled to share a significant milestone in our commitment to these principles: our third-party audit, conducted by a leading Forensic Certified Public Accountant firm, is progressing steadily toward completion.

This rigorous independent review, initiated at the request of our esteemed participants, serves as a powerful testament to the integrity and success of our liquidity provision strategies. By engaging top forensic experts, we are not only validating our day-to-day liquidity strategy but also providing irrefutable proof that your allocations are fueling genuine growth, free from any concerns. The audit will culminate in a comprehensive certified report, shared with all participants, reinforcing the robust health of our fund and empowering you with full visibility into our operations.

Important Note for October Distributions:

To ensure the audit's thoroughness and accuracy, and to have the audit completed before the end of the year, the audit team in conjunction with legal, has recommended a brief adjustment to our monthly distribution strategy. This adjustment means temporarily halting operations and as a result **your monthly distribution will be slightly delayed**. Goliath is working as quickly as possible to complete this phase of the audit and resume normal business flow. We are not in a position to advise as to the exact length of the payout delay, but rest assured you will receive your monthly distribution as planned. You will receive additional communication as this step is completed, and distributions have resumed.

This pause in outgoing direct distributions allows our auditors unrestricted access to trace every movement of funds, delivering the gold-standard verification you deserve. This is the only way this audit can be completed, which will scrutinize every transaction Goliath has made since the company's inception. Taking us "offline" ensures the safety of the Participant's contributions and compounding, as going offline ensures no sensitive data is compromised in any way. Allowing the auditors unfettered access can only be accomplished in a very strict and controlled way. The benefits are clear: enhanced credibility, fortified risk management, and a stronger foundation for continued success. In short, this step safeguards your deposits today while amplifying opportunities tomorrow.

We truly appreciate your patience and partnership during this process. Your continued confidence in Goliath Ventures drives our success, and we look forward to celebrating the audit's completion with you soon. Should you have any questions, our team is here to assist—contact support@goliathventuresinc.com.
