

# COMPENSATION SYSTEM

A community-powered digital infrastructure model

This presentation is for informational purposes only and does not constitute an offer to sell, a solicitation of an offer to buy any investment product, or financial advice. Participation Units and Rewards are utility instruments with no guarantee of return or profit.

# OVERVIEW

NodeLink operates a **participation-based reward system**.

## Rewards are earned through:

-  **Infrastructure Participation** -  
hosting physical infrastructure
-  **Community Participation** -  
sharing NodeLink with others

Community participation is optional.  
Users may choose to engage in one or both areas.

PART 1

# INFRASTRUCTURE PARTICIPATION

(Machine Hosting & Participation Units)

Infrastructure participation rewards users for contributing physical infrastructure to the NodeLink network.

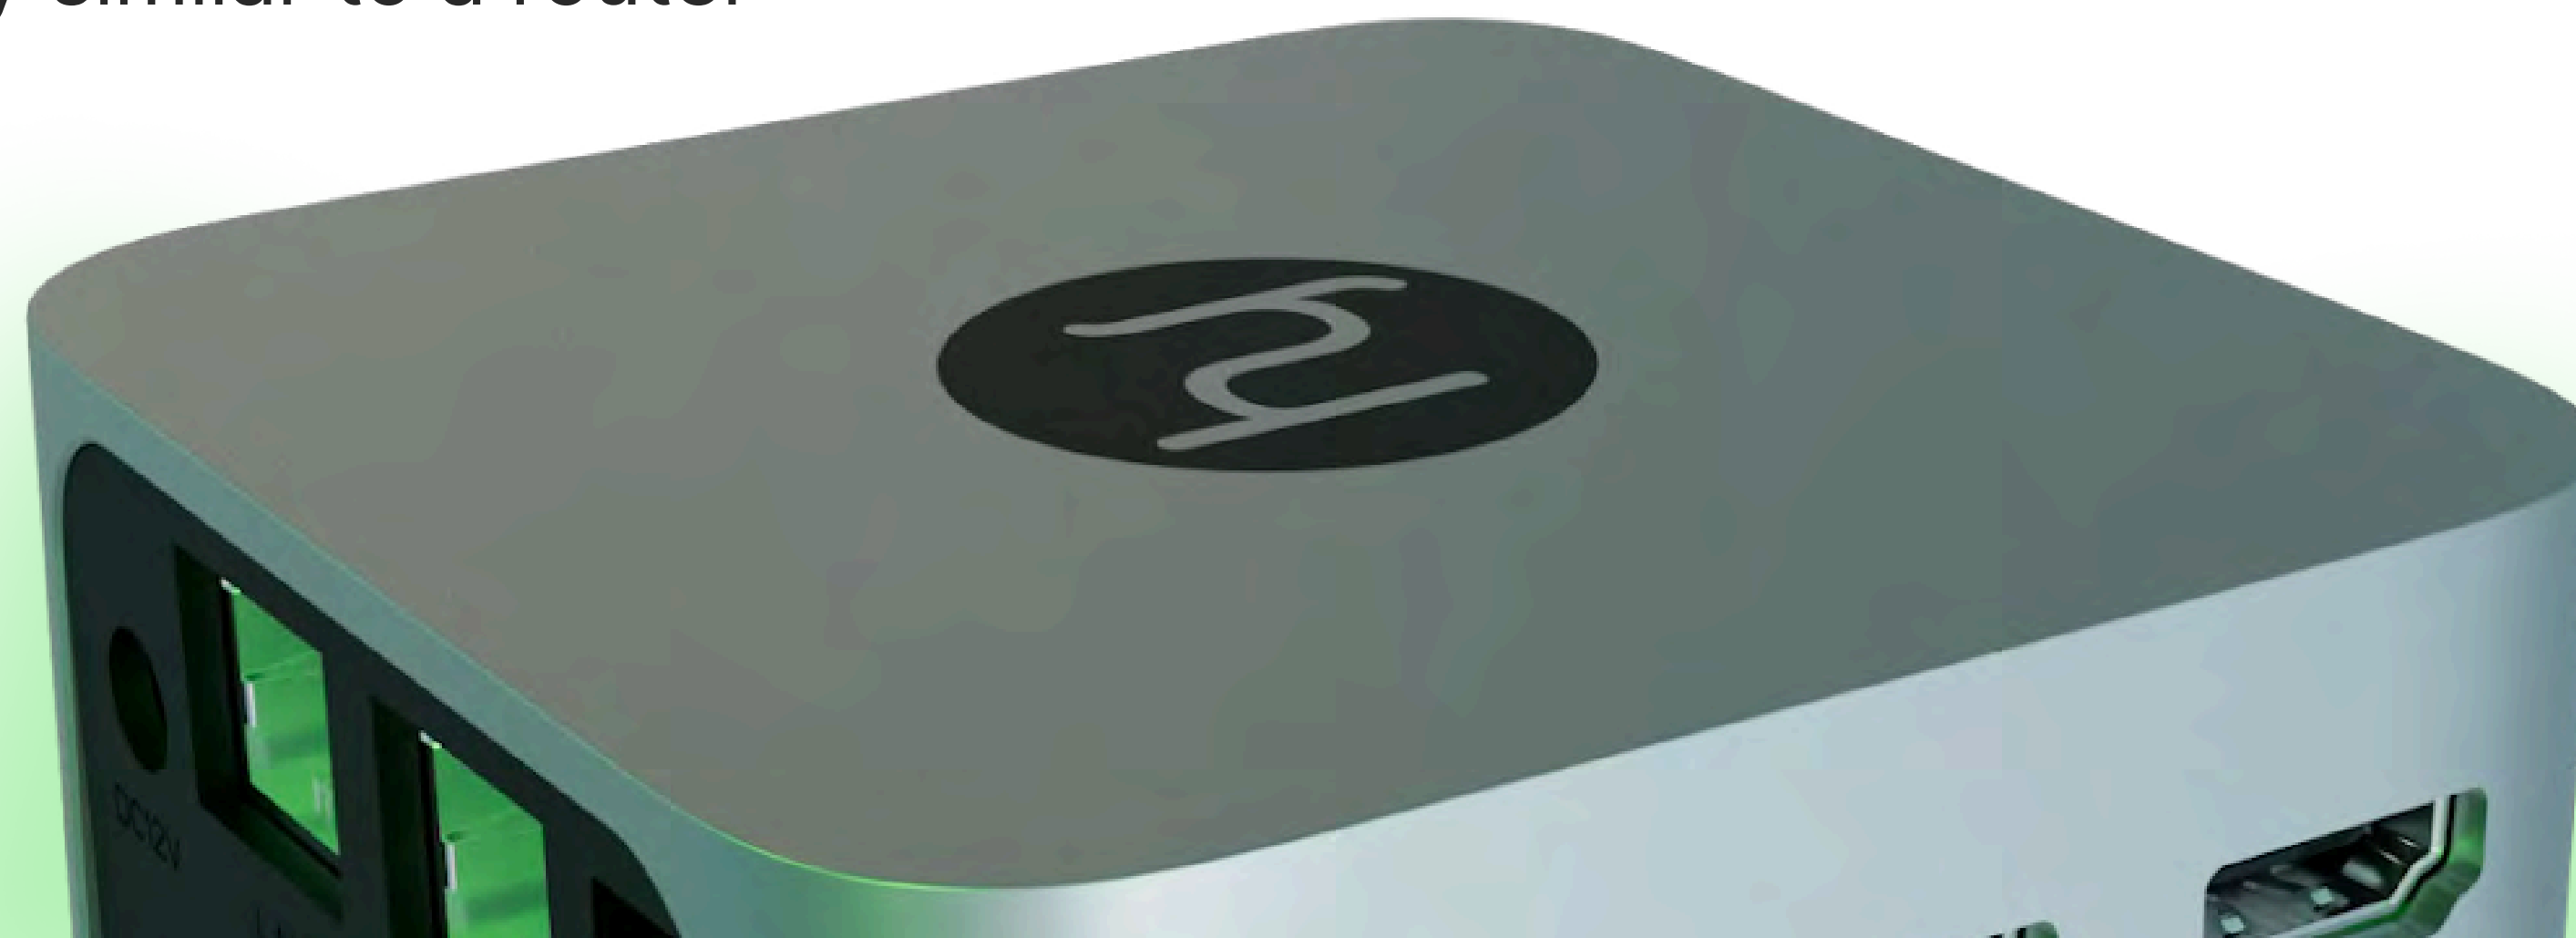

This presentation is for informational purposes only and does not constitute an offer to sell, a solicitation of an offer to buy any investment product, or financial advice. Participation Units and Rewards are utility instruments with no guarantee of return or profit.

---

## THE MACHINE

# Nx1 HOME STATION

-  NodeLink provides a **physical machine** called **Nx1 Home Station**
-  Nx1 Home Station is **installed in a home and connected to existing internet**
-  The machine **operates automatically** in the background
-  **No technical knowledge** is required
-  Consumes **minimum** electricity similar to a router

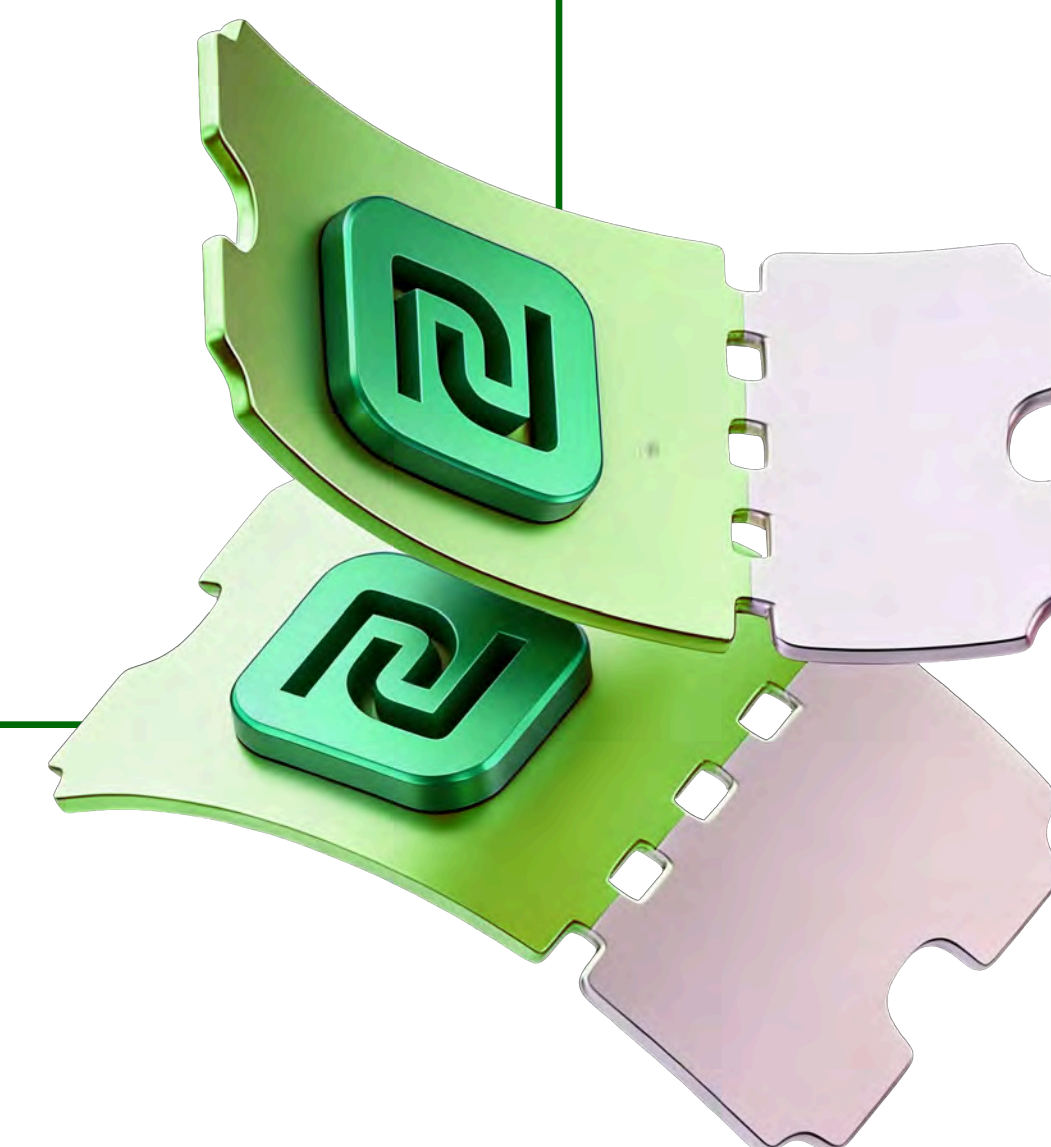

# PARTICIPATION UNITS

Participation Units define the scale of the **Nx1 participation**.

## Key Points:

-  Each Unit represents a **fixed participation value**
-  Each Unit has a cost of **\$25.00**
-  Units are activated on a specific machine (except Level 0)
-  Each machine supports **up to 100 Units**
-  Units can be added at any time
-  **Daily Infrastructure Rewards** are generated from active Units

Units can be purchased in NodeLink with USDN or in HMall with card.

# DAILY REWARDS

Infrastructure participation generates **daily infrastructure rewards**

-  Rewards are produced in **NLK (NodeLink Token)**
-  Withdrawable rewards are **automatically converted** into USDC/USDT
-  Rewards may be converted into **traditional fiat currencies** through supported channels
-  Rewards work across three **participation levels**, based on machine ownership and community contribution.
  - **Level 0 / 0+**
  - **Level 1**
  - **Level 2**

# INCREMENTAL LEVEL SCALING

Infrastructure participation includes level scaling, allowing participants to **increase their infrastructure rewards** through direct community contribution.

## CORE PRINCIPLE

-  **Infrastructure rewards increase** when participants personally sponsor **five active participants**
-  Progression for Level 0 culminates in Level 0+
-  Progression for Level 1 culminates in Level 2

## ACTIVE PARTICIPANT

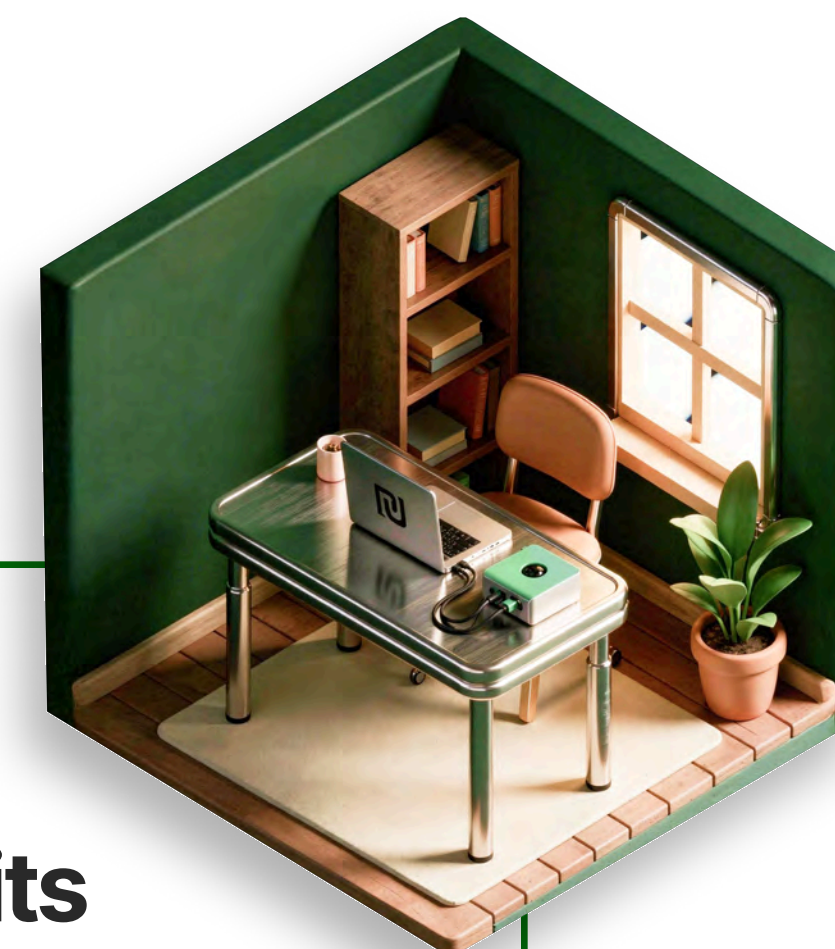

A person who owns either:

**an Nx1 machine, or**

**Participation Units**  
(with or without a machine)

# LEVEL 0 / 0+

## PARTICIPATION WITHOUT A MACHINE

- Users may activate up to **20 Participation Units** without owning a machine
- These Units are temporarily hosted on:  
NodeLink-operated infrastructure, or  
Available third-party infrastructure within the network
- Level 0 provides basic participation access
- After sponsoring **five active participants Level 0+** is achieved

### Daily Rewards - Level 0

- Up to \$0,025/day
- Per Participation Unit

### Daily Rewards - Level 0+

- Up to \$0,03125/day
- Per Participation Unit

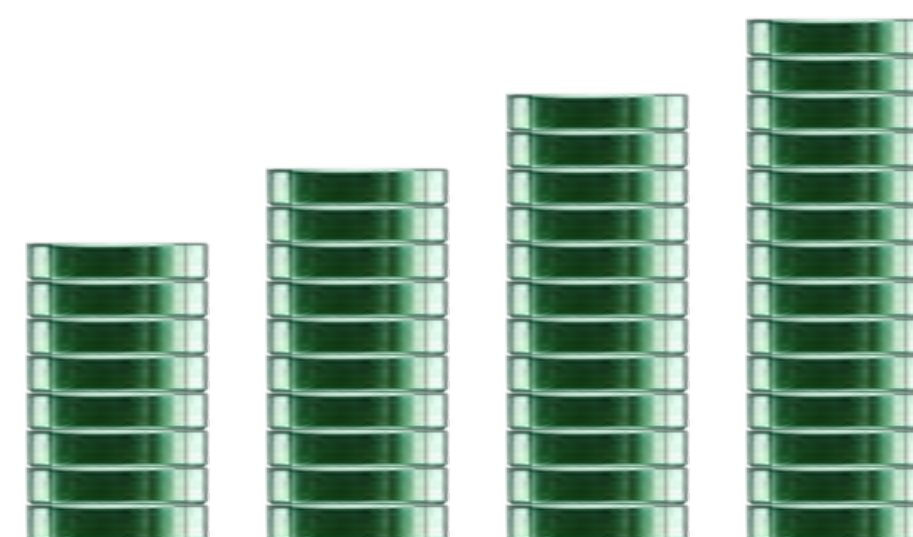

# LEVEL 1

## MACHINE-BASED PARTICIPATION

- To access Level 1, users must: Own an Nx1 machine, and Activate Participation Units on their own machine
- Level 1 represents **full infrastructure participation**

### Daily Rewards - Level 1

- Up to \$0,033/day
- Per Participation Unit

# LEVEL 2

## COMMUNITY-ACTIVATED PARTICIPATION

- To access Level 2, users must comply with Level requirements and **sponsor five** active participants
- Level 2 provides maximum participation benefits

### Maximum Daily Rewards - Level 2

- Up to \$ 0,04166/day
- Per Participation Unit

# REWARD SPLIT

Daily Infrastructure Rewards are Split According to Participation Level

## Level 0 and Level 1

- 80% withdrawable portion
- 20% long-term participation portion
- **Long-term portion:**
  - ⦿ Paid in NLK token
  - ⦿ Locked for 5 years
  - ⦿ Released gradually over 120 days after unlocking

## Level 2

- 70% withdrawable portion
- 30% long-term participation portion
- **Long-term portion:**
  - ⦿ Paid in NLK
  - ⦿ Locked for 5 years
  - ⦿ Released gradually over 120 days after unlocking

# MACHINE CONNECTION REQUIREMENTS

Each Nx1 machine requires a minimum internet bandwidth to operate correctly and generate full infrastructure daily rewards.

## Minimum Bandwidth Requirement

-  Minimum required bandwidth per machine:  
**200 Mbps**

## Machine Limit per Internet Connection

-  A single internet connection may host up to 5 Nx1 machines
-  The total number of machines allowed depends on the available bandwidth

## EXAMPLES

-  **1,000 Mbps (1 Gbps) connection →**  
Supports up to 5 machines (200 Mbps per machine)
-  **600 Mbps connection →**  
Supports up to 3 machines

# IMPORTANT NOTES

- Each machine must have access to **at least 200 Mbps** to operate at full capacity
- If available bandwidth per machine falls **below the minimum requirement:**
  - ◎ Infrastructure **rewards may be reduced by up to 15%**
- If the internet connection is offline, machines do not generate rewards
- Maximum 5 machines per internet line
- **Additional machines require:**
  - ◎ A higher-capacity internet connection, or
  - ◎ A separate internet line assigned to the machine(s)

PART 2

# COMMUNITY PARTICIPATION

Community participation rewards users who actively introduce others to NodeLink and help grow the network.

Participation is optional and independent from infrastructure participation.

This presentation is for informational purposes only and does not constitute an offer to sell, a solicitation of an offer to buy any investment product, or financial advice. Participation Units and Rewards are utility instruments with no guarantee of return or profit.

# NODE GROWTH PROGRAM

## POINTS SYSTEM (VP vs CP)

NodeLink uses two internal point types:

### Volume Points (VP)

-  Used only for **role qualification**
-  Accumulate **permanently**
-  **Assigned** to most purchases

### EXAMPLES

- **Machine purchase** → VP only
- **Participation Units** → VP

### Commissionable Points (CP)

-  Used only to **calculate commissions**
-  Only CP generates **referral rewards**

### EXAMPLES

- **Participation Units** → generate CP
- **Machine purchases** → do not generate CP
- **Internal USDN usage** → does generate CP

# INTERNAL DISTRIBUTION RULE (80/20)

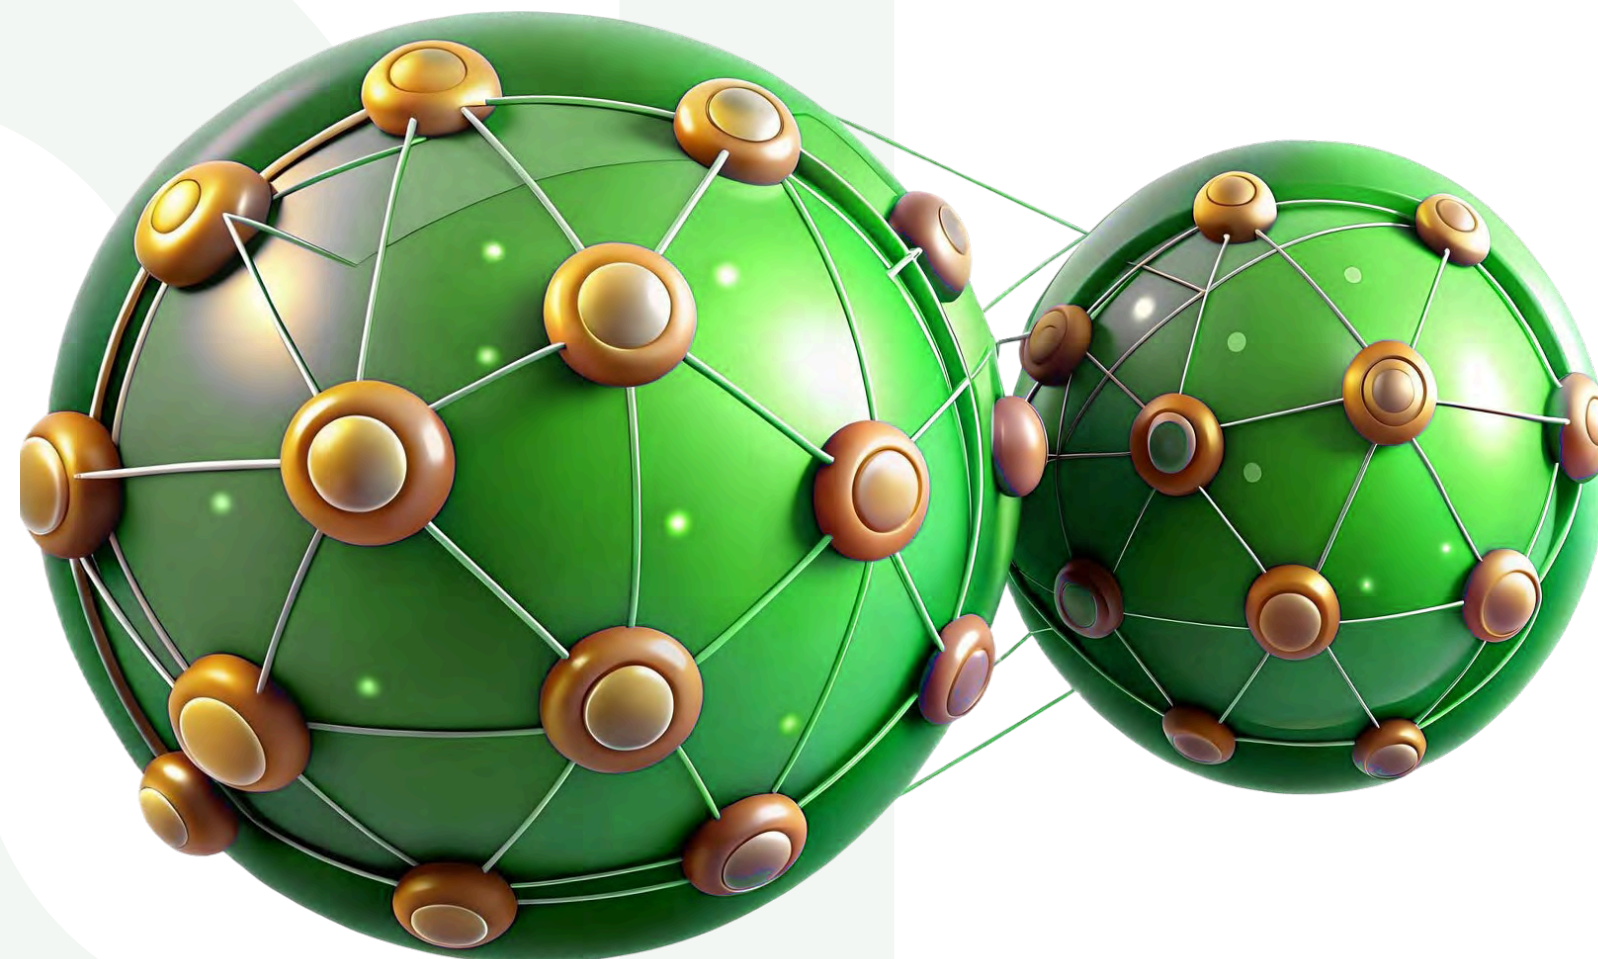

All Node Growth Program rewards are distributed as follows:

**80%**

Withdrawable USDN-W

**20%**

Internal USDN

## Internal USDN rules:

- Cannot be withdrawn
- Can only be transferred to downline participants
- Can be used to purchase Participation Units
- Can be used in USDN Program
- Internal USDN usage generates VP and CP

# DIRECT BONUS

The Direct Bonus rewards personal referrals.

## Direct Bonus Structure:

-  **15%** during the first 30 days after account activation
-  **10%** thereafter

## Key Rules:

- **Paid on CP** generated by personally referred users
- **Paid** in USDN
- Subject to the **80/20 internal distribution rule**

# ROLE SYSTEM

Roles reflect **long-term** community contribution and unlock **higher earning potential**.

**N1** **5.000**  
Required VP

**N2** **15.000**  
Required VP

**N3** **30.000**  
Required VP

**N4** **100.000**  
Required VP

**N5** **250.000**  
Required VP

**N6** **500.000**  
Required VP

**N7** **1.000.000**  
Required VP

- Roles are **permanent**
- **No** monthly **re-qualification**
- VP **never** resets

# POWERUP ROLE BONUS

The PowerUp Role Bonus rewards depth and structure of the community.

## Key Principles:

Percentage depends on:

**Role** (N1–N7)

Number of **qualified lines** (1 to 5)

Only N7 with 5 qualified lines can reach the **maximum percentage**

## Line Qualification Logic

- **Line 2** must contribute 30% of required VP and must be a single leg/team
- **Lines 3–5** may be combined from multiple legs/teams
- **Line 3:** 20% of required VP
- **Line 4:** 10% of required VP
- **Line 5:** 5% of required VP

A “line” may be a single team or multiple teams combined.

# POWERUP + MATCHING BONUS TABLE

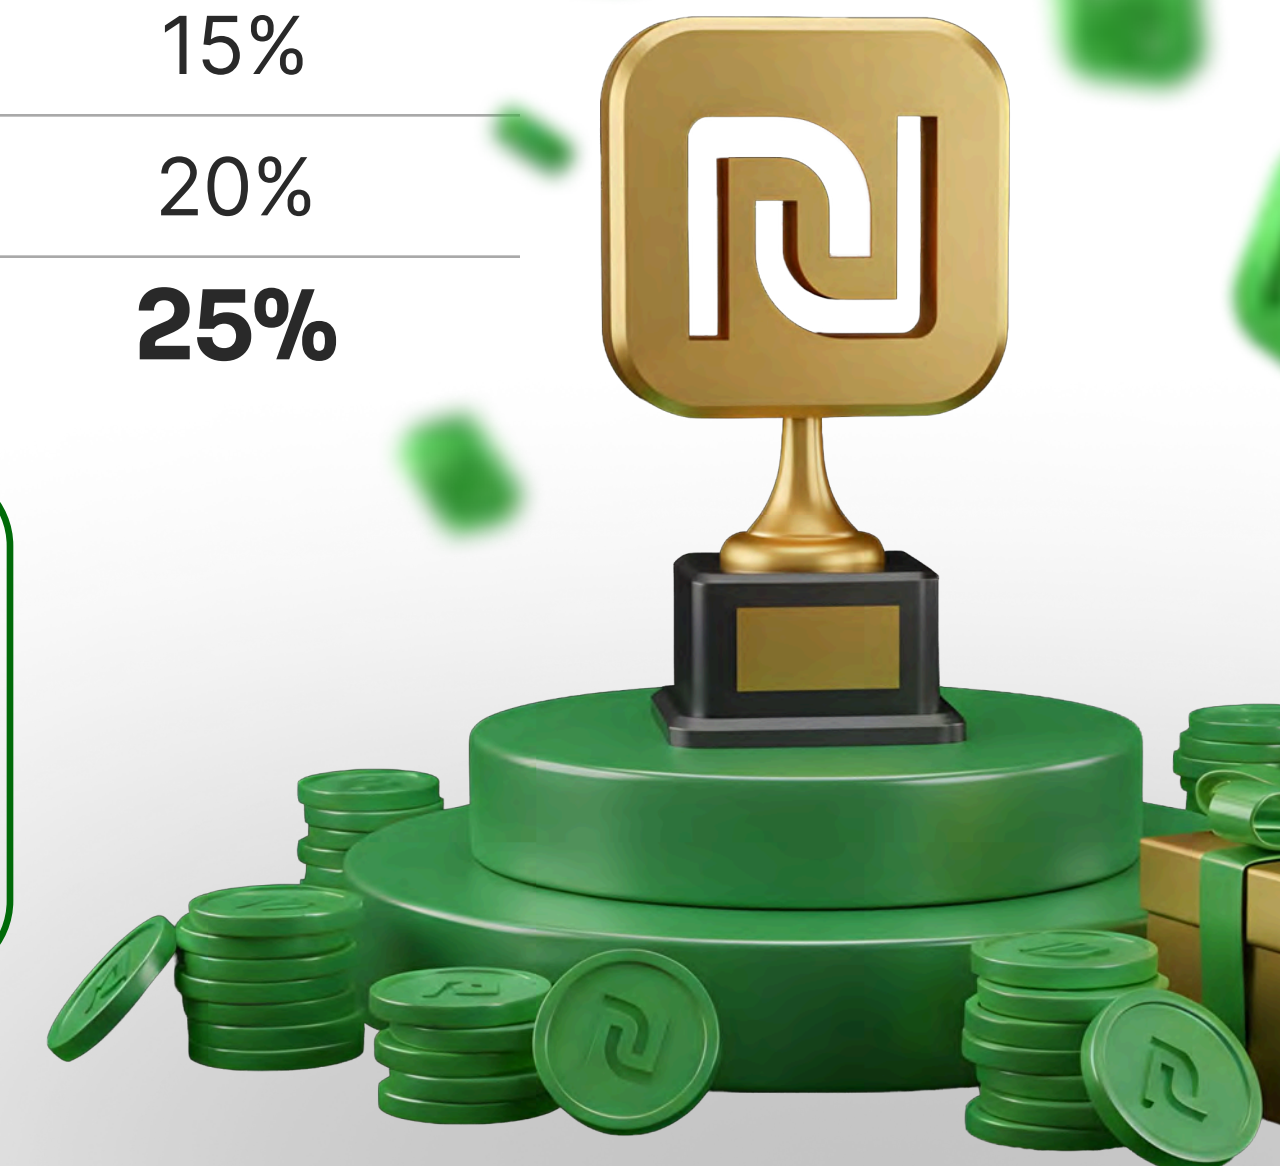

Role	Required VP	Directs	1 Line	2 Lines (30%)	3 Lines (20%)	4 Lines (10%)	5 Lines (5%)	Matching
N1	5.000	1	3%	4%	-	-	-	
N2	15.000	2	4%	5%	-	-	-	
N3	30.000	3	5%	6%	9%	-	-	10%
N4	100.000	4	6%	9%	12%	14%	-	12,5%
N5	250.000	5	7%	10%	13%	15%	17%	15%
N6	500.000	5	8%	12%	14%	17%	19%	20%
N7	1.000.000	5	9%	13%	17%	19%	<b>23%</b>	<b>25%</b>

 **Paid in USDN**

 Subject to the **80/20 distribution rule**

**Matching Bonus**

- Paid on the **PowerUp rewards** of qualified downlines

# NODE ACTIVITY PROGRAM

The Node Activity Program rewards users based on the rewards generated within their organization.

Paid exclusively in USDN token.

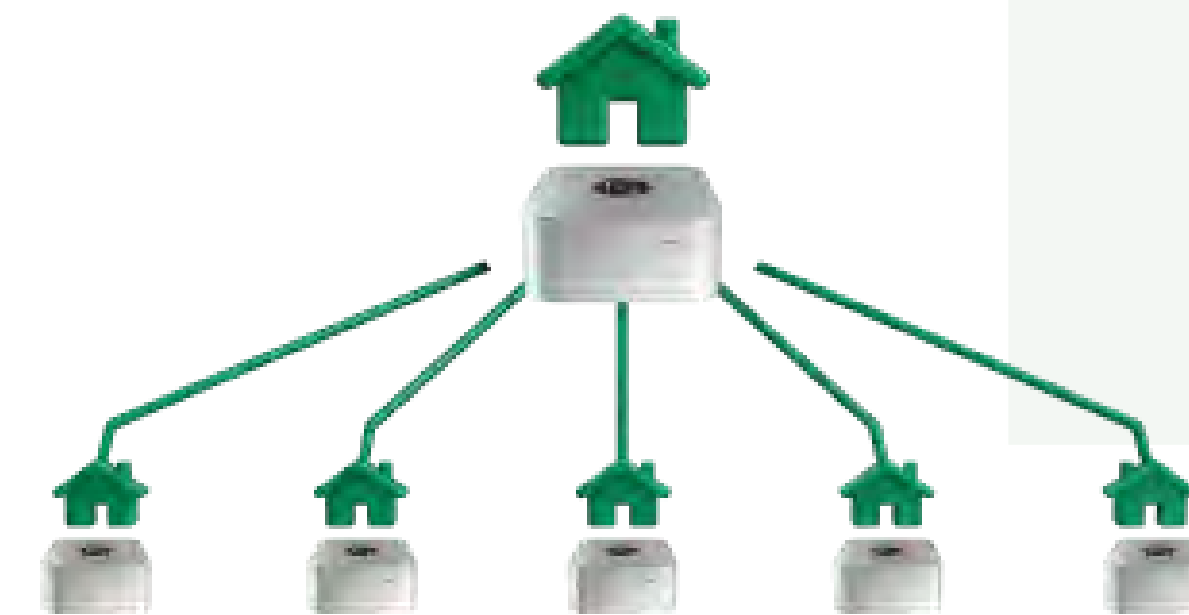

## Key Principles:

100% **Withdrawable** USDN-W

**Based on NLK** rewards generated in your organization

## DIRECT REFERRAL BONUS

**5 levels deep**

**5% per level**

**Based on** organizational participation

Level	Directs Required	Bonus
Level 1	1	5%
Level 2	2	5%
Level 3	3	5%
Level 4	4	5%
Level 5	5	5%

# NODE ACTIVITY PROGRAM

The Node Activity Program rewards users based on the rewards generated within their organization.

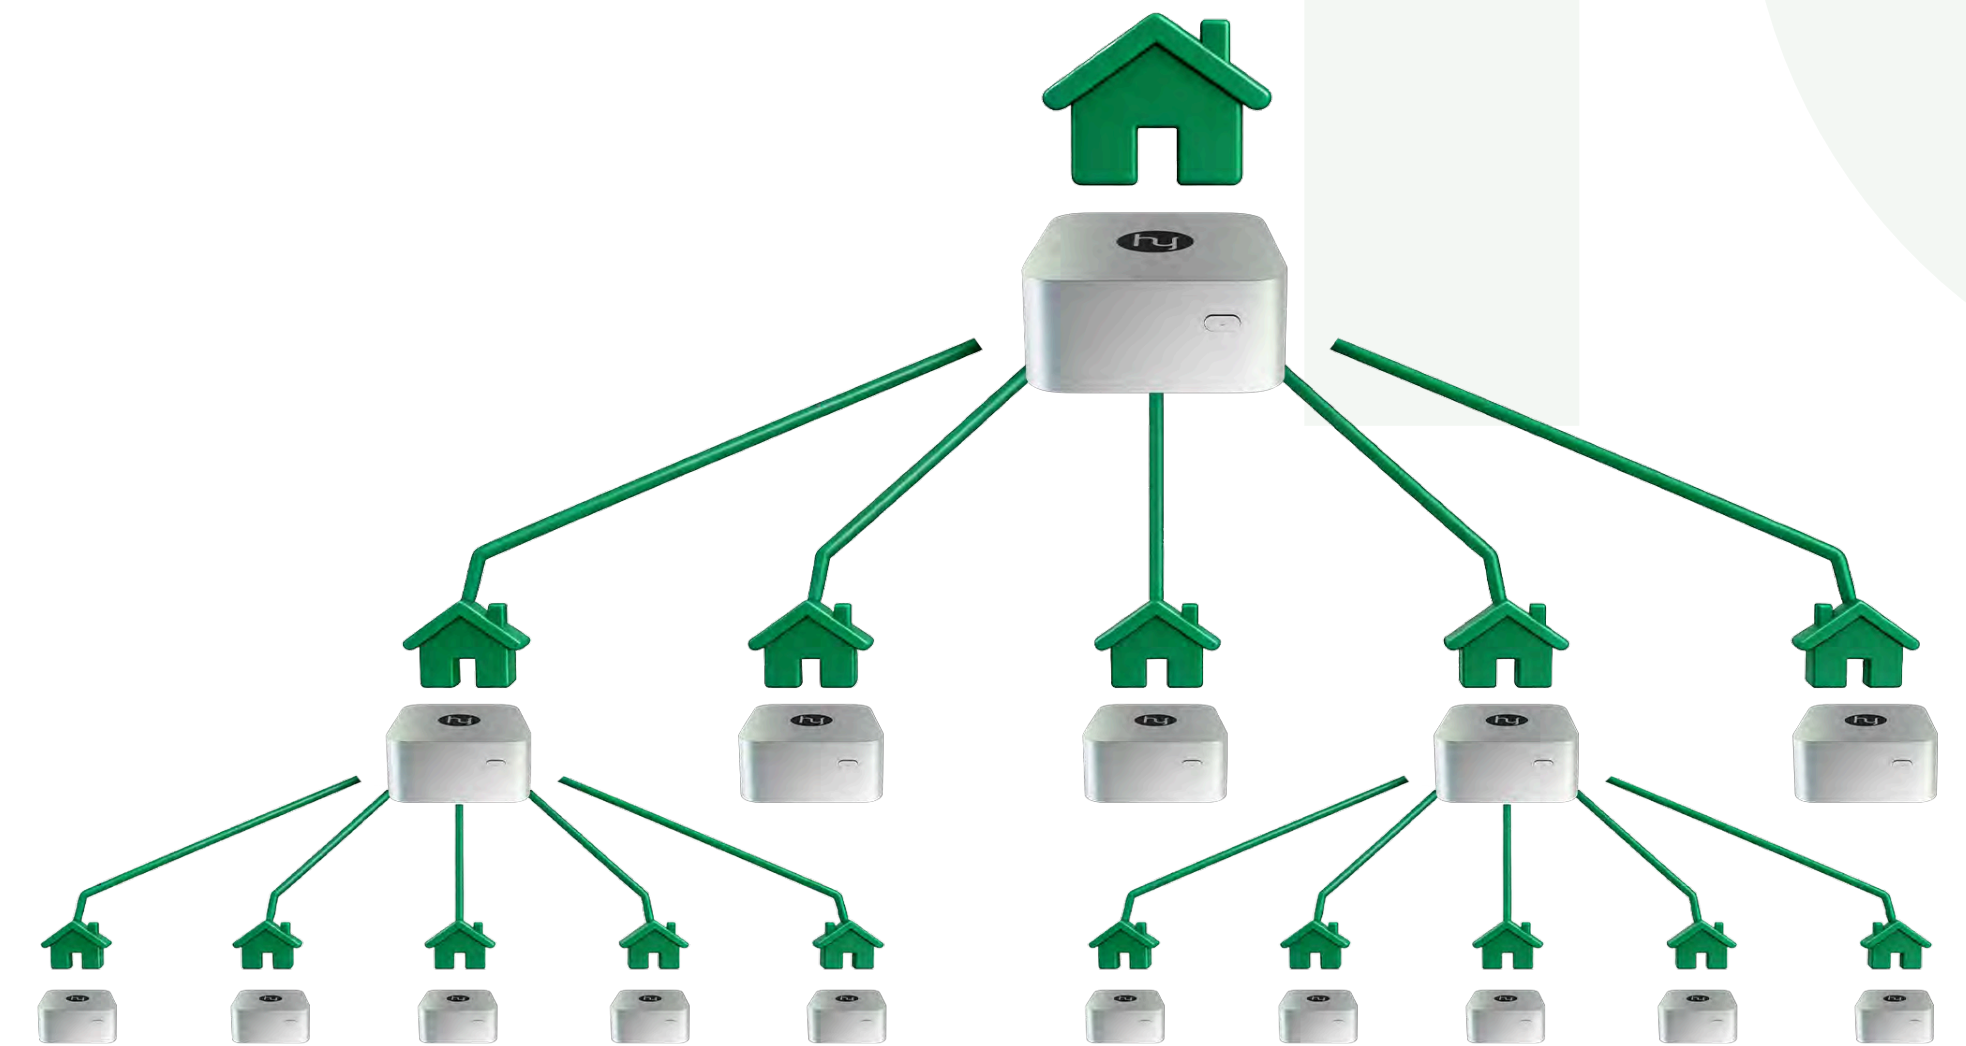

Paid exclusively in USDN token.

## ROLE BASE BONUS

The Role-Base Bonus is role-based and rewards leadership depth.

Role	Role-Base Bonus	Daily Cap in USD
N1	2%	25
N2	4%	75
N3	6%	150
N4	8%	500
N5	10%	1500
N6	12%	3000
N7	<b>14%</b>	5000

Role-Based Bonus rewards are subject to a maximum daily cap, based on the participant's active participation level.

- **Paid** in USDN Token
- **Must be** with at least two lines

# NODE ACTIVITY PROGRAM

The Node Activity Program rewards users based on the rewards generated within their organization.

Paid exclusively in USDN token.

## ROLE-BASED MATCHING BONUS

In addition to the **Role-Based Bonus**, leaders may earn a Matching Bonus when they develop other qualified leaders.

### How it works:

- If a downline participant qualifies for a **Role-Based Bonus**
- And their direct or indirect **upline** also qualifies
- The **upline earns a 20% Matching Bonus** on the Role-Based Bonus earned by that downline

# EARLY CONTRIBUTOR PROGRAM

The Early Contributor Program recognizes the first group who helps establish the global NodeLink infrastructure.

## Key Rules:

- **Limited** to the first 50,000 machine owners
- **Activated** once the threshold is reached
- **Funded by 4%** of network service revenue
- **Applies for** the lifetime of the network
- **Maximum** \$5,000/machine per year

## Qualification:

- Active **machine participation**
- Minimum role: **N4**
- Must be with **at least two lines**

## Share Allocation:

Role	Shares
N4	1
N5	2
N6	3
N7	4

Only qualified Early Contributors receive distributions.

Receive additional shares every time someone matches your Role.

PART 3

# PARTICIPATION BENEFITS

Nx1 machine owners receive access to a set of included utilities and long-term benefits enabled by the NodeLink network.

These benefits are provided as part of participation and are not required for earning rewards.

This presentation is for informational purposes only and does not constitute an offer to sell, a solicitation of an offer to buy any investment product, or financial advice. Participation Units and Rewards are utility instruments with no guarantee of return or profit.

# 1. NODELINK TOKEN AIRDROP

When Participation Units are activated, participants **receive a NodeLink Token (NLK) airdrop as an additional long-term benefit.**

## Key Terms:

- Each Participation Unit has a **fixed cost of \$25**
- **80%** of the unit value (\$20) is **distributed as NLK via airdrop**
- **Airdropped tokens are:**
  - ⦿ Locked for 5 years
  - ⦿ Released gradually over 120 days after unlocking

## Purpose:

-  Aligns **long-term** participants with the growth of the NodeLink network
-  Designed as a participation **benefit**, not a short-term incentive

## 2. HASH DISCOVERY ENGINE

Each **Nx1 machine** includes an integrated Bitcoin Proof-of-Work Participation Module.

### How it works:

- The machine performs SHA-256 hash computations on Bitcoin block headers
- It connects to secure full-node infrastructure
- Dedicated CPU cores contribute computational work to the Bitcoin network
- If a valid block is discovered, the reward is sent to the user's Bitcoin address

### Key Notes

- Not industrial-scale mining
- Designed for decentralized participation, not predictable income
- Probability of discovery is low due to global competition
- Runs automatically while the machine is active

### 3. SECURE CONNECTIVITY (ROLL-OUT Q2 2026)

Nx1 machine owners receive access to a secure connectivity service (VPN) delivered via a dedicated application.

#### Included Features:

- **Encrypted** internet traffic
- **Privacy-focused** routing
- **Protection** on public and private networks

#### Usage:

- **Available** for the machine owner and family members
- **No additional subscription required**

#### Context:

-  Comparable VPN services typically cost \$200–\$300 per year
-  Within NodeLink, this **service is included** as part of participation for five people, during five years (valued at more than \$5,000)

## 4. AD BLOCKER & AI SECURITY TOOLS (ROLL-OUT Q3 2026)

NodeLink will introduce **AI-powered** digital protection tools, delivered through the **Nx1** ecosystem.

### Planned Capabilities:

- **Intelligent** ad and tracker blocking
- **Detection** of malicious or phishing websites
- Real-time **risk alerts** during browsing

### Child & Family Protection:

- **AI-based** detection of potentially unsafe online interactions
- **Alerts** for abnormal or high-risk behavior patterns

These tools are provided as included utilities, not paid add-ons.

## 5. INTERNET OF THINGS (IoT) INTEGRATION (LATE 2026)

Nx1 machines will support connectivity with compatible household devices.

### Expected Capabilities:

- Integration with **smart home** appliances
- Unified device communication through the **Nx1 Home Station**
- **Secure** local network coordination

This enables participants to experience decentralized IoT functionality without additional infrastructure.

## 6. THIRD-PARTY MODULES & PARTNER SERVICES (FUTURE PHASE)

As the **NodeLink** infrastructure expands, external technology partners may connect specialized hardware modules to the **Nx1 ecosystem**.

### Examples include:

- Distributed **data storage**
- Compute **power modules**
- Advanced **connectivity services**

### Key Principle:

- Services provided by connected partner modules are included for **Nx1 machine** owners
- **Participants do not purchase or subscribe separately** to these services

These tools are provided as included utilities, not paid add-ons.

# 7. PAYLINK BANKING SOLUTION

Nx1 machine owners receive access to PayLink, NodeLink's integrated non-custodial banking interface.

## Included Features:

**Integrated Virtual Card,**  
provided at no additional cost

**Secure management**  
of fiat and cryptocurrency balances

**Unified dashboard**  
for digital funds

### Note

- PayLink is **not a bank**
- Funds remain **under user control**
- **No** lending, credit, or interest products
- Availability may **vary** by jurisdiction
- Use of PayLink is **optional**

### FINAL NOTE

- All utilities and services are provided as participation benefits
- Availability may depend on rollout phases and jurisdiction
- Benefits do not affect reward calculations
- Participation in utilities is optional

**NodeLink**
