OXUSTECH

+ COMPANY
MISSION
GOAL

01 COMPANY

OxusTech is a technology company building next-generation infrastructure for earning on global digital markets. Prediction markets and cross-exchange arbitrage — designed as a scalable ecosystem where algorithmic strategies, execution speed and automation work as a single mechanism.

02 MISSION

To erase the line between professional earning technology and the everyday participant — to give everyone access to the speed, algorithms and automation that drive results on digital markets.

03 GOAL

To turn access to digital-market yield into a technology standard — opening to private participants the opportunities that used to belong only to large professional teams.

The person behind the technology

Konstantinos Kalaitzidis is co-founder and CEO of Oxus Tech, a technology company building infrastructure for event-based markets.

01 Career start

Started his career in Greece at UBS Europe SE as a Market Operations Analyst on institutional markets. Handled securities and government bond operations, transaction settlement and reconciliation, client reporting, and coordination with custodians and compliance teams.

02 Move into betting exchange

Moved into the European betting-exchange industry, where he worked on product operations, market launch and settlement, and payment infrastructure development.

03 Founding OxusTech

His experience with institutional financial markets and digital trading platforms became the foundation for building Oxus Tech.

How it works

Every outcome on Polymarket is a contract that settles at exactly one dollar.
When the combined cost of both sides comes in below a dollar, the difference is locked in as profit and doesn't depend on the outcome of the event itself.

EXECUTION SPEED — THE CORE USP

2—5ms

The key competitive advantage that sets us apart from every other way of trading. The arbitrage window stays open for 10–50 ms — only infrastructure with dedicated servers can catch it in time. The strategy itself is open and easy to understand — what cannot be reproduced is execution speed. Profit doesn't depend on the event's outcome — the income comes from the price structure.

Target yield

0.45–0.75% per day

Yield depends on the level of the personal contract. The higher the level, the higher the daily passive income rate: from 0.45% to 0.75% per day after the protocol fee.

ESTIMATED YIELD BY CONTRACT LEVEL • 0.45–0.75% PER DAY

LEVEL	CONTRACT USDT	PER DAY	PER MONTH ≈	INCOME OVER 30 DAYS*

— A partner is considered active with a qualifying contract of \$100 or more. Rewards land daily on the bonus balance based on the combined volume of level-1 partners.

Downline bonus

The Downline bonus accrues on the combined team volume starting from level 2 and below. The rate rises with the number of active level-1 partners and reaches 0.04% per day.

CONDITION	RATE
Step A · 1–4 partners	up to 0.01%
Step B · 5–9 partners	up to 0.02%
Step C · 10–19 partners	up to 0.03%
Step D · 20 partners or more	up to 0.04%

01 Partner contract

Team partners count from a contract of 500 USDT.

02 Rewards

The bonus comes from every level of the team every day.

03 Daily cap

Maximum accrual amount — 3,000 USDT per day.

04 Compression

The largest team's turnover counts only up to the combined turnover of all the other teams.

Calculation example

At a rate of 0.04% per day you earn 1.2% per month over 30 days. Below are income examples for different team volumes.

TEAM VOLUME	PER DAY	PER MONTH	OVER 12 MONTHS
\$100,000	\$40	\$1,200	\$14,400
\$250,000	\$100	\$3,000	\$36,000
\$500,000	\$200	\$6,000	\$72,000
\$1,000,000	\$400	\$12,000	\$144,000
\$2,500,000	\$1,000	\$30,000	\$360,000
\$5,000,000	\$2,000	\$60,000	\$720,000

The calculation is approximate and doesn't account for team volume growth or changes to qualification requirements. The maximum bonus accrual is capped at 3,000 USDT per day.

Pool share Bonus

UP TO 7.5% OF COMPANY PROFIT • PAID OUT EVERY MONDAY AT 01:00 UTC

POOL	PERSONAL CONTRACT	TEAM VOLUME
Pool 1	1,000 USDT	5,000 USDT
Pool 2	2,500 USDT	10,000 USDT
Pool 3	5,000 USDT	25,000 USDT

Pool 7	50,000 USDT	2,500,000 USDT
Pool 8	100,000 USDT	5,000,000 USDT

Pool qualification is based on the combined volume of your contracts and your team turnover.

Rank bonus

Rank bonus is a system of seventeen ranks. Reaching each rank pays out a one-off bonus. The bonus amount grows together with the volume of the whole team.

40%

40% RULE
The rank system applies a 40% rule. No more than 40% of effective volume from a single line is counted toward rank calculation. This means the entire team volume must come from at least 3 different lines.

Calculation example. Your contract is \$100 and you invited a partner with \$1,000. In this case your effective volume equals \$400, i.e. $\$1,000 \times 40\%$. To receive the bonus you need three active branches with a combined effective volume of \$1,000.

Global Leader Pool

QUALIFICATION TERMS

\$3000/day

Entry threshold for the elite pool

Daily income from the Downline bonus must be at least \$3,000 — this is the entry threshold for the Global Leader pool.

SOURCE	PERIOD	RANK
Downline	Daily	R15

The elite ninth pool: entry threshold — daily Downline bonus income of at least \$3,000.

CALCULATION MECHANISM

0.01% OF STREAMLINE VOLUME

The pool is formed from 0.01% of the company's total Streamline volume and is split evenly among all qualified participants.

HOW IT WORKS

- 01 The company's Streamline forms the overall pool
- 02 Qualified participants enter the distribution
- 03 The share is split evenly among all Global Leaders
